User Story

User Story ID	User Type	Task	Goal
1	A Website visitor	Being able to read what the website is all about.	This way they can learn more about this application and potentially being able to use it in the future.
2	Implementer	To be able to check if there are any bugs.	This way they can have an easy flowing application without any complaints etc.
3	Client	The ability to log in whenever they are returning.	As a returning client, they should have the access to login whenever the wish to since this is a user interactive application.
4	Client	Easily being able to communicate.	Being able to talk to others to find an end goal for themselves which is being able to find a group of people to play sports with.
5	Client	Changing their personal information	With time, the client may feel they will get better at a certain sport, therefore this would give them the ability to change their personal rating within the sport if needs be.
6	Client	Invite other clients to a sports game of their choice.	This way they can have the numbers they need for the sport and be able to play the game without any issues.
7	Website visitor	The ability to sign up	This way they can interact and use the application as a start-up client.
